A close-up photograph of a man's face. He has dark hair and is smiling broadly, showing his teeth. His right hand is raised to his head, with his fingers resting near his temple. The background is blurred, showing what appears to be a landscape with hills or mountains under a cloudy sky.

Mobile Layout – Landing Page

Landing Page

- Profile photo
- Buttons
- Header and Footer

- The pages share a similar design.
- Navigation Bar has moved to top.
- Headings scale depending on screen and space.
- Border-style: ridge;
- Shading.
- Rounded edges for each box and image.

About Me Projects Blog

Home About Me Projects Blog Contact

About myself

My name is Maximilian and I am a 20 year old student studying at Coder Academy. I work part-time for a Philippine company called Codetech, where we are trying to implement blockchain systems throughout various government sectors. Additionally, we are also working on a mobile application for easier transactions between Filipinos who do not currently have a bank account. Furthermore, I also act as an independent agent for a private jet firm based in Europe.

Hobbies

Learning to play the guitar

I recently picked up the guitar and it has served as a type of medicine. It allows me to forget my surroundings and take a break from reality.

Football & Liverpool FC

When I was growing up football was everything to me. I still love it to this day. I take my time to play football regularly and try my best to watch my favourite games.

World of Warcraft as my current go-to game

My father gifted my brother a super nintendo for his birthday and that was the first time that I fell in touch with video games. Immediately, I fell in love with it.

Projects

Things that I enjoy reading about are the mysterious things that are happening in our universe. One of those things are currently in an age where immense amounts of data can be collected and used by technology to run complex simulations helping us understand the behavior of time and the universe, thus giving mankind a better understanding of our current understanding.

NASA detects bright flashes of light on Jupiter

A team of NASA scientists has spotted strange flashes of light known as "optical auroras" on the planet Jupiter in the upper atmosphere of Jupiter.

There was another Planet in the Solar System that escaped

According to team of scientists at the Carnegie Institution for Science, an additional planet that once orbited between Saturn and Uranus got flung out of the solar system.

"Really Unexpected" Molecule in Atmosphere of Saturn's Moon

Using a massive radiotelescope in Chile, a team of NASA scientists say they have detected a hitherto unknown molecule in the atmosphere of Titan.

If the Readings Are Right, There's Something Very Strange About This Exoplanet

"For the first time, we measured the light coming out in the infrared panel that shouldn't exist."

Astronomers: This Star Isn't As Giant As We Thought, Just Closer

For years, astronomers have been speculating about the giant star Betelgeuse, in the Orion constellation, which is about 650 light years away, a rare event so close to home.

Fixing the dining table

I have been trying to find the time to fully varnish the dining table. So far, the benches have been completed and the table itself still needs some love.

Delivery of biometric driver's licenses for the Philippines

The new Driver's Licenses that are currently being rolled out in the Philippines boast 32 security features with fingerprint biometrics. With a handheld device, the law enforcers are able to immediately scan the license and get rapid feedback on its authenticity. We are currently trying to get the driver's licenses delivered to the doorstep.

In this page you will find the current projects that I am working on.

Learning to play "Hallelujah" by Jeff Buckley

To me this is a challenging song that I have been trying to learn for while. The biggest challenge I am currently facing is strumming the right chord while keeping the chord progression in mind.

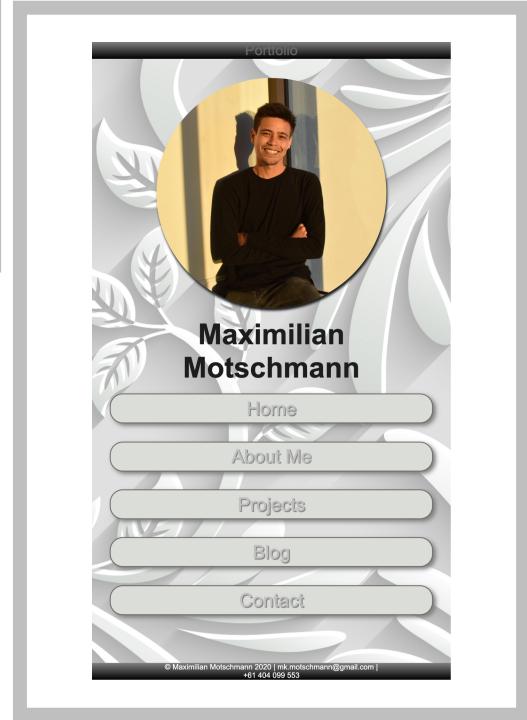

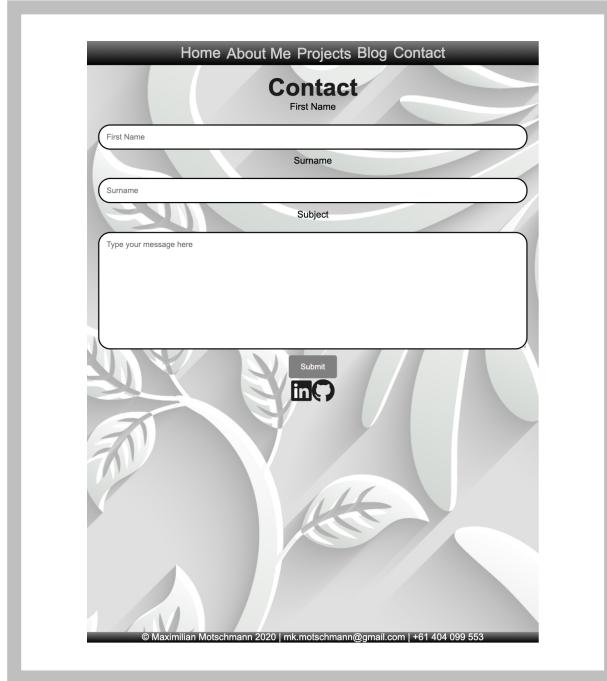

Tablet Layout – Landing Page

- Heading scales with resolution.
- Profile image scales
- Margin between buttons increase.

Changes made:

- Reduced the margin between the profile photo and my name
- Centered button text

About Me

Blog Posts

Projects

- Boxes have a max-width & height.

Changes made:

- Went back to the mobile code and changed the box height, because the text was spilling.
- Navigation bar was left and had to be centered for Tablet view

The collage consists of six screenshots from a mobile website, each featuring a different content card:

- Blog posts:** A card with a dark background showing a close-up of Jupiter's surface with bright flares. Text: "NASA detects bright flashes of light on Jupiter".
- Blog posts:** A card with a dark background showing a blue planet (Earth-like) against a dark background. Text: "There was another Planet in the Solar System that escaped".
- Blog posts:** A card with a dark background showing the greenish-blue surface of Saturn's moon Titan. Text: "'Really Unexpected' Molecule in Atmosphere of Saturn's Moon".
- Blog posts:** A card with a dark background showing the reddish-orange surface of an exoplanet. Text: "If the Readings Are Right, There's Something Very Strange About This Exoplanet".
- Blog posts:** A card with a dark background showing a bright, orange-red star. Text: "Astronomers: This Star Isn't As Giant As We Thought, Just Closer".
- About myself:** A card with a white background showing a photo of a person playing a guitar. Text: "Learning to play the guitar".
- Hobbies:** A card with a white background showing a photo of three Liverpool football players celebrating. Text: "Football & Liverpool FC".
- Projects:** A card with a white background showing a photo of a person playing an electric guitar. Text: "Learning to play 'Hallelujah' by Jeff Buckley".
- Projects:** A card with a white background showing a photo of a wooden dining table being sanded. Text: "Fixing the dining table".
- Projects:** A card with a white background showing a photo of a hand holding a Philippine driver's license. Text: "Delivery of biometric driver's licenses for the Philippines".

Desktop Layout – Landing page

- Image scales to max-width and height.

Changes made:

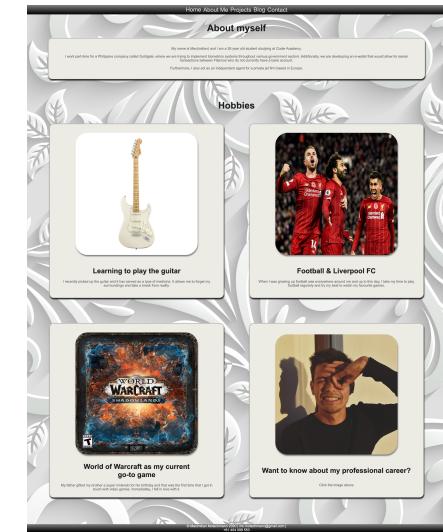

- Aligned and centered the button text to the button.
- Further reduced the margin between Profile Image and my name.

About Me Projects Blog

- Top box in each of the pages shares a max-width.
- The boxes wrap around with the help of flex-wrap.

Changes Made:

- None

Challenges

- Getting a satisfactory design
- Picking the right colours
- Making the pages look more alive
- Getting the footer to stay at the bottom
- Getting the profile picture centered and my name
- Keeping the code organized
- Reviewing the code
